

February 14, 2019

Dear Chair Monnes Anderson and Members of the Health Care Committee,

Attached you will find the documents referenced in Senate Bill 649. This bill would task the Oregon Health Authority to make available online the following vaccine information on one central website location:

- 1) Manufacture's package insert
- 2) Vaccine Information Sheet (VIS) – currently handed out in office to patients as required under Federal law.
- 3) CDC Excipient and Media Summary (Ingredient) List
- 4) Identification of any recommended childhood vaccines that contain any State of Oregon identified High Priority Chemicals of Concern for Children's Health
- 5) Sample State of Oregon Document to be handed out along with the Federal VIS statements prior to administering a vaccine

This information is for distribution among Health Care Committee members, sponsors and other interested parties.

Please let me know if there is any other information I can provide relating to Senate Bill 659.

Kindest Regards,

Sarah Bacon
