Please vote YES on HB2314! If you take just a bit of time to look into research and results from places that have legal lane splitting, you will see that it not only eases congestion, which we know is a HUGE problem in Portland, but it is also SAFER for motorcyclists due to the decreased risk of being rear-ended. Rear end collisions are a frequent cause of motorcycle fatalities and are becoming even more of a threat with so many distracted drivers on the road. As a daily motorcycle commuter, I wear full safety gear; I'm a middle-aged female librarian, and I wish I could lane-split to make it safer for me to travel in traffic. Please vote YES on HB2314.
