

Thank you Chair Monnes Anderson and Committee Members for hearing bill SB 649. I am writing in support of this bill as I feel that as consumers we have the right to all information on the products we are using for ourselves and our children, including pharmaceutical drugs. My daughter recently had pneumonia and was on ten days of amoxicillin. When I received her prescription I was also given the package insert that has pertinent information I might need to know about how to use the product and any side effects that may occur. This ask should be a no-brainer as a right to have access to information and transparency about products we are consuming and injecting into ourselves and our children.

Thank you for your time,

Jordan Ohrt
