

Dear Health Care Committee Members,

As a Mom and an Educator, I spend a lot of my time looking at the ingredients of many products; food, cosmetics, cleaning supplies. As a consumer I have the right to receive the information on a vaccine insert prior to vaccination just like I would for any other product I use. If my kids' pediatrician had access to the information on vaccine inserts at their fingertips, I would be able to have a conversation with them and make a decision based on true informed consent.

I support SB 649.

Thank you,

Carrie Kirschner,

Resident of Portland, Mom, educator
