Dear committee members

Please vote to pass HB2314. This would allow motorcycles to be out of the way and not take up space in auto lanes during high volume traffic hours. Motorcyclists now during warm weather experience tremendous heat waiting in traffic that is neither good for the rider or motorcycle. Riding so slowly stop and go can be dangerous and is very fatiguing to the rider. possibly more people would use these smaller vehicles thereby reducing congestion and fuel consumption.

Thank you for your consideration of this matter

Sincerely

Alvin J. Geddes III (Jim)
