

I small timberland owner in eastern Oregon. I oppose bill 2152. In this bill there is high taxes for timber owners. When it takes 100 years to harvest a tree and a 60% chance you can do any harvest. Any raised taxes would put a bigger expense on land owners.

On our land we have taken great steps to protect water and wildlife. These activities benefit all people but in this bill the high taxes would be an expense to myself with no way to recoup this from any income from the land.

Thank you for you time
