To whom it may concern,

I urge you to support HB 2795. I believe that the pursuit of cougars using hounds in Oregon should be legal. Through first hand experience, while deer and elk hunting my hunting partners and I have experienced an increase in the sighting of these cougars and an increase in cougar sign. I have found a number of calf/fawn skeletons in areas I never use to see them. Other predators are not present in these areas. It's not realistic to manage the cougar population without the use of hounds. Please show your support for HB 2795.

Thank you,
Jason Johnson
