

SB 211-1

Chair Hass and members of the committee.

SB 211-1 is an improvement in the pass through income. By eliminating those who perform services from the category of taxpayers who receive this benefit you have made some improvement.

The cap of \$415,000 however is still too high.

A lower cap would indeed help smaller businesses and provide more resources for state of Oregon needs.

It would also provide fewer bosses who pay taxes at a lower rate than their employees.
