

Please don't punish Oregonians with higher energy prices.

The US is leading the world in CO2 reduction.

Meanwhile, China and India lead the world in CO2 increase. Before Oregon burdens their citizens with higher energy prices, the focus should be on China and India. Perhaps helping Trump to shift manufacturing to the US is a good start.

Meanwhile, the earth has cooled over the last 3 years, according to NOAA and the slight, gradual increase started in 1940, well before CO2 became a factor. Please look at ALL the science.

Please don't punish Oregonians with higher energy prices.
