

As senior citizens from a depressed area of the state, we think the cap and trade bill will do nothing more than add hardship to those on a fixed income and to those who are struggling to just support their families. We also are in a large agricultural area and the increased fuel and natural gas prices would severely hinder what economy we do have. Are you sincerely wanting to help the poor- the disadvantaged ? Don't pass this legislation that will scientifically do little to improve the environment.
