

“Our planet is very precious and a beautiful gift to EACH and EVERYONE of US, and every other LIVING THING. We have to take care of our precious planet NOW-So we and future generations may reside here on Planet Earth. Planet Earth is a gift for all, and we all need to be grateful to her. All the horrifying Fracking, and Hacking and Oil Drilling has been DESTROYING OUR PLANET, Causing MASSIVE STORMS, the likes of which we have NEVER SEEN More and More EARTHQUAKES, VOLCANOES, EXTREMELY FRIGID COLD and HOT WEATHER, FLOODING, ALL DESTROYING people's lives, killing many dear -precious people, animals, and other beautiful things in nature (trees, flowers insects, I could go on!!!!). WHY are We DOING THIS- IT HAS TO STOP NOW, OR WE WILL ALL Die- that is EXTREMELY SCARY. We need to invest in SOLAR, and WIND ENERGY To SAVE OUR PLANET. These are very efficient sources of energy and more cost effective. We need research other sources of Natural energy to use. Our soil is SO depleted and FULL of CHEMICALS, crops are planted in this soil, and we are all affected, and ultimately dying from it. We need much more Organic Farming and affordable, healthy food to eat. The DEADLY CHEMICALS being sprayed in OUR AIR, and YES IT IS HAPPENING- Believe it or Not! This is having a PROFOUND EFFECT on all of our health, causing breathing difficulties, CANCER, and Other health problems, not only us but it affects animals and other living creatures.” - Patti Knighton, Eugene Oregon.
