

I am apposed to HB 2020. If your objective is to hurt the middle class and people like me, this is the mechanism for that. We receive a poverty level pension. Higher fuel prices will hurt us greatly as we live in a rural area were traveling to specialist Dr is required. Besides that, unnecessarily burdening our industries will drive jobs and industries out. The best thing we could do to curb carbon is to remove old trees and replace them with young vigorous trees that convert carbon to oxygen at a much greater rate.
