

Everything about this does not make sense. It is just a money grab and taking it out of the hands of the people who work hard for their money and giving it to a government group who is going to make it harder for farmers, ranchers, and business owners who rely on fuel to make a living. The whole cap and trade idea is a waste of time. The concept doesn't make sense in any way and will NOT reduce carbon emissions by taking credits from one producer and giving it to another. All this is, is a transfer of money with the government and special interest groups at the root of the problem. Proves to me who is really benefitting from this propaganda and it isn't the guy trying to make a living and support his and her family.

This is a HUGE OVERWELMING NO from me and many around me. We are farmers and ranchers in my area just trying to support our families and help feed people. Why do these issues always center around us, the people who feed you? Oh that's right, because you have our money to do with as you please, while we are working our ever living fears off to support you! Do your job and stand up for the people who pay your salary!

Sincerely,

One of the many who is sick and tired of being stopped on!
