

Dear Senator Fagan and other Committee Members,

I support Senate Bill 10 as I believe that if we are to address climate change we will need to focus development in areas of high transit to reduce auto dependency. Additionally, building housing in transit-areas will allow more folks to afford to live in our metro areas and reap the economic benefits.

Senate Bill 10 advances our environmental and equity goals and I urge the committee to support it.

Thank you for your time.

Best,

Brandon Narramore
