Letter in opposition to SB 10

I am writing from Eugene where roads are closed and my power is out so I must keep this brief. Similar to my feelings regarding HB 2001, this bill is an outrage. You must understand I support planning for the growth that is coming and I accept infill will occur in my “backyard” but this type of broad blanket and heavy handed legislation is an affront to the foundations of good, smart planning and an affront to Oregon’s established goals of local planning and citizen involvement. My community has been begging for neighborhood planning for smart infill but city planners here have made it essentially impossible. This bill has so many problems I would deplete was remains of my phone battery writing about it.

There is absolutely no evidence this type of action would do anything to alleviate the affordability problem and plenty of evidence to show it would make it worse, not to mention destroy and waste usable existing housing. Toss SB 10 out. Help us have neighborhood based planning.

Sincerely,  
Pam Wooddell
