

To the Members of the Senate Subcommittee On Business and General Government:

Profit motives of the growing cannabis industry in Oregon are placing health outcomes our state has worked to initiate and maintain as a result of the Clean Air Act at risk. When considering legislative initiatives such as SB 639 please remember that keeping the current language of the Clean Air Act intact as a core working principle is essential to your decision making process. Attached you will find a copy of a policy paper from the American Nonsmokers' Rights Foundation entitled "Protecting Nonsmokers from Secondhand Marijuana Smoke" (2018). I hope you will find it a useful resource.

Sincerely yours,  
Anthony Dean  
Citizen  
Portland, Oregon
