

To whom it may concern:

I am an Oregon parent and support the right of a parent to choose what is best to his or her child, including refusing vaccines for any reason. I have an autoimmune disease, and my son is more likely to develop serious autoimmune issues also because of my issues. Dr. Paul in Portland supports vaccine choice for parents, and delaying vaccines in certain circumstances such as ours. Please preserve parental rights so that I can protect my child from undue harm because he may be unable to handle the ingredients in the vaccines and detoxify as easily as other children. Forcing medical procedures defies the freedom this country was founded to protect.

Thank you for your service and your time.

Sincerely,  
Janine Schaben  
Turner, OR
