

Dear House Committee,

I wanted to voice my opposition for bill HB 3063. This bill literally backs parents into a corner and removes all religious rights regarding vaccination. We do not vaccinate because the vaccines contain unethical ingredients such as aborted fetal cells, aluminum and other toxins. My children are exceptionally healthy and top students at their school because they haven't been vaccinated. They NEVER get sick! This bill would force me to homeschool my children and take away their right to a public education. This bill should die now and not even go to the next step.

Thank you,

Sarah Ince
