

Dear Gov. Brown,

I just witnessed one of the most disturbing exhibits by a Democratic Senator that I have ever seen: Diane Feinstein ignorantly, and with great hubris, sneering at the young children who were begging her to support the Green New Deal. They were begging for their lives and their futures.

Please do not do the same. Please do not be complicit in the destruction of the world and the next generation (my grandchildren). I doubt if "Murder she Wrote" is the epitaph you seek. Support the Clean Energy Jobs Bill, banish greenhouse gas purveyors, support sustainable solutions; be a great leader and try to save our little world.

Sincerely
Lee Lull
