

Please vote no on HB-3063.

When I voted for some of you I expected fixing transportation, advancing education, working on improving lives.

I did not vote for you to decide what goes inside my (or my child's) body.

You can not give me 100% guarantee that it would be always safe.

You would not pay nor support me if anything goes wrong with vaccinations.

You would not pay for DNA testing to determine if I do have valid medical reason.

Please vote NO. STOP HB-3063. Allow exceptions.
