

I am a resident of Hillsboro, OR. I just want to write and say I fully support this bill. I do not want my kids going to school with unvaccinated children who do not have a medical reason to not vaccinate. It puts the whole community at risk. I have 6 month old daughter who is relies on herd immunity to not catch thing like the measles and the flu. It is rediculous that we keep having outbreaks of preventable disease. Giving the people a choice not to vaccinate based on pseudo science is putting my child at an unessary risk. A risk that is not in any child's best interest. The government needs to step in and make sure these children are protected since their parents are incapable of making rational decisions. I believe in science. I believe in vaccines. I believe that for the good of the community it must be mandatory to vaccinate children to attend public school. Please pass this bill!!!

Thank you, Laura Bosch
