

Please support HB 2020 to combat climate change in Oregon.

Climate change is a crisis causing extreme wildfires, extreme dryness and heat and extreme storms to drop for more moisture in the form of floods throughout the country.

Global warming will destroy farmland and crops, our forests and fisheries (as there is less snow in the mountains and less water in the rivers).

HB 2020 will create good paying jobs by investing in renewable sources of energy.

HB 2020 will be good for Southern Oregon.

Please vote for HB 2020.

Thank you.
