

Dear Legislators

My family and I strongly OPPOSE House Bill 2020 and I would hope you would do the same. The added cost would hurt us financially due to the high housing cost in the City I work in so I live 20 miles away where the housing is more affordable. The added cost of fuel is just going to make my budget even tighter preventing us from saving for emergencies and retirement in the future. The added cost is also going to affect my employer which in turn will have a negative effect on the customers we serve and my fellow coworkers and I when it come to yearly cost of living increases for us. HB 2020 will raise the cost of living for my family and I in all aspects from are groceries to energy and feed for are pets.

Oregon is already one the the cleanest places in the world HB 2020 will make little to no impact on carbon emissions in fact it could raise them if it pushes some manufacturing out of state or out of country. We should be embracing are manufacturing and businesses promoting job growth not giving them a crutch. If you want to reduce carbon emissions we should be talking to are Federal government to implement a wild fire full suppression policy to match our Oregon Department of Forestry's wild fire full suppression policy.

VOTE NO on HB 2020

Sincerely from the working class
Heath Myers
