

To whom it may concern ( Kate Brown and others ) ,

With all honesty, it concerns us all. We have to stop treating the earth like a smash and grab for profit. This beautiful planet is home to us all. IT ITSELF AND ITS INHABITANTS ARE NOT OWNED BY CORPORATIONS. And yet, both are being poisoned by the latter.

Do not sell out Oregon. This is OUR home. Don't allow corporations to define how we can live. It is inexcusable to even think that it's ok to allow anything or anyone to take someone's land. Our government should be protecting its citizens, not allowing greed and political contributions to dictate how we all live.

If you don't see a problem in nature, your; blind, dumb, or just ignorant. Or even worse, corrupted. By greed. We ourselves see it all around. From collapsing species, to the loss of habitat. Everything humans do from this point on is of grave concern. How is profit worth the future we will leave our children?

Ask yourself this, how many corporations came into Oregon, made an environmental mess and just left us with it? Answer: Too many. And anyone who helped support that mistake should have been held responsible. And yet nearly no one is.

Why do I even have to write this? It's common sense. Greed and shortcuts equal disaster.

Anyway, I am sick with the flu otherwise I'd be in Medford today. Please, use your head, not your wallet to make any decisions effecting Oregon and its inhabitants, which includes its citizens. Be smart, its people before profits. No job, no money is worth what you can't undo.

Our future is truly in your hands,

David Marszalec ( father of two )
