

To my Oregonian legislature and Representatives.

My name is Brittany. My Husbands name is Trent

We am here to tell you about our family, we are here to tell you about our American dream, we are here to be heard.

We have three amazingly beautiful children who we will go to the end of the earth for. We are sure you'd do the same for yours as well, as most parents in this beautifully free country.

Dylan age 3; Our first. She's a blue eyed blonde who is incredibly wise beyond her years. Emotions drive her, shes passionate and caring.

Ryan age 2; Our second. Shes a wild red head with piercing blue eyes. She is the fire that ignites every soul she comes into contact with.

Know age 4 months; He comically has elderly man pattern baldness with deep blue eyes. last but not the least. Hes given us a run for our money in his short time with us. But he is without a doubt the tail end of our family and completes every part of my husbands and I's being.

My healthy children are not a threat to the public. They don't magically carry communicable diseases. They cannot spread what they do not have.

My children are few of millions of children who are this country's future. They will build our country, they will care for us today when the time comes we can no longer care for ourselves. They are future parents. They are the worlds next leaders. They are the people who will take your place when you are no longer to hold your position.

We are on a path of destruction within our children. What future will the State and County have when majority of our citizens are disabled to some extent. Vaccines are ruled "unavoidably unsafe". The manufactures of these vaccines are not held liable for safety, tax payers are. A product with such labels and lack of responsibility should NEVER be mandated to any extent. No child should be refused an education because their parents have made an informed decision for their safety and well being.

Now the main point, and most certainly the most important point. Medical exemptions. They are hard and expensive to obtain. Doctors are years behind the new hard science showing that genetics play a HUGE role in how our bodies respond to everything we come into contact with. Cleaning chemicals, pesticides, and yes... vaccines. Children who have a predisposition to these adverse reactions due to their genetic make up may nit have to resources, the funds or the knowledge to obtain a medical exemption. Inevitably putting them in harms way of serious adverse events or even death. The minority and middle class don't even have access to a PCP little alone genetic testing and counseling. this population is being pout in great danger if our rights to a person/philosophical or religious exemptions are stripped.

Who will care for these disabled children? Who pays for their care? Who pays for the medical needs? Once their parents are long gone?

We as parents have made the decision not to vaccinate based on informed consent. We have weighed the pros and cons, countless hours reading real package inserts. The autoimmune disorders in our families, the mental illness, and the very real, very serious vaccine reaction my children's grandfather experienced. But those "aren't enough" to receive a medical exemption. So we rely on personal belief exemptions to keep our children safe.

If this bill does pass. It will not change our decisions. It will only result in our family homeschooling and removing ourselves from the public school system. This bill will not force us to conform to the government's overreach in our medical freedoms. As many other parents who are in our exact position.

As their mother and father we have big dreams for them. We do live in the land of freedom and dreams after all don't we? but above all, We dream of them being healthy, happy and humble human beings; and Americans.

Their health and well being is important, not only to the mothers, fathers, grandparents, friends.. but to this amazing country.

We are here to ask that you reconsider taking away our medical freedoms by voting against and/or opposing House Bill 3036.

Thank you for your time, we greatly appreciate you taking the time to read our concerns and we trust you'll do the right thing for our children.

Brittany & Trent
