

To Whom it May Concern,

I am a parent in Oregon who opposes Bill 3063. I believe parents have a *fundamental right* to make informed medical decisions for their children—decisions free from unnecessary and overreaching mandates

I believe in personal freedoms and individual choice. Giving the state the right to mandate a medical procedure, and compromising the freedom for parents to make personal medical decisions is not something I will support. We should continue protecting vaccine exemptions for families that believe it is the best decision for their children.

I hope you take into consideration the rights and opinions of a current voter and parent

Thank you for your time,

Erin Feeney
