

Hello,

I am a 44 year old mother of 2, a son who is almost 18 and a daughter who is 11. Both were born at home in California, both unvaccinated. Both breastfed until at least 20 months old, both extremely healthy.

I will not be told by any doctor or government mandate that my children require vaccinations against diseases that their OWN NATURAL IMMUNITIES will fight for them! Our bodies have built into them antibodies that are meant to fight off disease without the need for vaccinations. Vaccinations which are known to have toxic effects on the mind and body.

Please have common sense in these matters and don't force unneeded vaccinations on parents who choose not to vaccinate their children. If a person so chooses to vaccinate their child, it is their choice and should remain a CHOICE!

Thank you,
Leah Anderson
