

This is ridiculous. As a parent of 3 and 5 year old children I beg of you, stop the assault on our rights to care and raise our children as we see fit. There is no greater good than basic human rights like bodily autonomy and medical freedom. 5 years ago as a new parent I researched everything, from car seat safety to co-sleeping, to best strollers and of course vaccines. My husband and I are college educated, middle class, tax paying citizens. The full childhood vaccine schedule has NOT been tested, no long term health outcomes have been studied, no active adverse reactions system exists (the current system for reporting adverse reactions is passive and woefully under used) so we really don't know the extent of the damage they're inflicting on our kids. Trading the slight possibility of developing a largely benign, self limiting childhood illness for lifelong chronic conditions? No thanks! Or worse yet, my friend lost her baby (confirmed by autopsy) to the DtaP shot!! If there is a risk there must be a choice! It's a basic human AMERICAN right. Sacrificing even one child for the greater good is still child sacrifice.

Manufacturers have been dis-incentivized from making safer more effective vaccines thanks to their immunity, why don't you go after the real problem? These greedy corporations are looking for repeat customers and their bottom line (check out which drug is currently their highest profiting product, hint it's a vaccine) you really think they have the best interests of our children at heart? Every parent must have the right to weigh pros and cons and make their own healthcare decisions, we have the most to lose.

There is no measles emergency Oregon!!! No child has died in over 10 years and this is an emergency? Our founding fathers would be rolling over in their graves if they knew about your proposed medical tyranny and attempts at coercion. **"Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety."** Benjamin Franklin
