

I oppose HB3063.

I am pro-vaccine, a healthcare provider, and I am against the government mandating medical decisions.

It goes against our right to informed consent, our right to decide what we put into our bodies.

This is not a simple fix. This bill doesn't fix the problem, and it causes many more problems, namely ignoring our basic medical right to consent to treatment.

Regards,

Dr. Tiffany Prado, DACM, L.Ac.
