

Please Vote NO on Cap and Trade

I work for an Oregon business that competes nationally and will be harmed by this bill. Additionally, my family is not able to afford the increased cost of living expenses that will come as a result of this program. Our gas prices are already some of the highest in the nation. All of this for a bill that your own experts have told you will do nothing to impact climate change. We can't afford meaningless solutions.

I work for an Oregon business that competes nationally and will be harmed by this bill. Additionally, my family is not able to afford the increased cost of living expenses that will come as a result of this program. Our gas prices are already some of the highest in the nation. All of this for a bill that your own experts have told you will do nothing to impact climate change. We can't afford meaningless solutions.

Dear Senator Dembrow and
Representative Power:

I work for an Oregon business that competes nationally and will be harmed by this bill. Additionally, my family is not able to afford the increased cost of living expenses that will come as a result of this program. Our gas prices are already some of the highest in the nation. All of this for a bill that your own experts have told you will do nothing to impact climate change. We can't afford meaningless solutions.

COMMUNITIES

Dear Senator Dembrow and
Representative Power:

I work for an Oregon business that competes nationally and will be harmed by this bill. Additionally, my family is not able to afford the increased cost of living expenses that will come as a result of this program. Our gas prices are already some of the highest in the nation. All of this for a bill that your own experts have told you will do nothing to impact climate change. We can't afford meaningless solutions.

Dear Senator Dembrow and Representative Power:

I work for an Oregon business that competes nationally and will be harmed by this bill. Additionally, my family is not able to afford the increased cost of living expenses that will come as a result of this program. Our gas prices are already some of the highest in the nation. All of this for a bill that your own experts have told you will do nothing to impact climate change. We can't afford meaningless solutions.

For the Desk of:
Senator Michael Dembrow
Representative Karin Power

To whom it may concern,

Cap and Trade legislations threaten one of the most crucial of Oregon's economic foundations. The agricultural and wood products industries in this state have been threatened, marginalized, over-regulated, trampled and devastated by bureaucratic ignorance masquerading as environmental protection for generations. The members of the leadership and work forces of the agricultural and wood product companies in this state are among the greatest stewards of our environment and go to great lengths to serve and protect it. This legislation is another in a long history of unwarranted assaults on this industry and cannot be allowed to continue.

We are facing a crucial crossroads in this state. The timber and wood products industries have proven their strength and sustainability as we have all recovered from the economic crash in 2008 and have grown into new areas of the marketplace with greater market share than ever. These are industries worth investing in, nurturing and growing! The so-called emissions that are in question here are not only vastly dramatized by extreme environmental organizations, they are currently well within the limitations that have already been forced upon us. If we continue to spend our time looking for ways to regulate good businesses to death, we will follow along the inevitable path to driving all tax paying businesses out of this state. Our infrastructure, especially in our rural communities relies on these companies and their futures rely on the growth of this industry as a whole.

Even if the emissions from our facilities and others that fall within this legislation did warrant more stringent regulations, this is not what will be accomplished. This legislation is clearly one more way to limit and eventually halt the harvest of our *most plentiful and renewable resource* in the name of environmental preservation. Your constituents will not sit idly by and watch our homes, businesses, communities and *viable timberlands* be railroaded by such a reckless and useless regulation. We ask you to take a stand for the future of our state, by taking a stand for the industry that built it.

Sincerely,

Katherine Eves

Please Vote NO on Cap and Trade

I work for an Oregon business that competes nationally and will be harmed by this bill. Additionally, my family is not able to afford the increased cost of living expenses that will come as a result of this program. Our gas prices are already some of the highest in the nation. All of this for a bill that your own experts have told you will do nothing to impact climate change. We can't afford meaningless solutions.
