

Dear Oregon Legislators,

Good afternoon. I am a resident of Klamath Falls, Oregon. I am one of many moms torn between vaccinating and not vaccinating. We want our children to always be safe and healthy, but the ingredients used to make these vaccines are toxic, especially towards newborns and children. I heard from parents and peers that Oregon wants to pass HB 3063. I **WILL NOT** stand by this bill and strongly oppose it! **It takes away the MEDICAL FREEDOM AND PARENTAL CHOICE IN OREGON in regards to vaccination.** When I heard about this bill being considered to pass, I couldn't stand by and watch this freedom get stripped away from me and other parents who may not be aware of this bill. You **REPRESENT** us, the people of Oregon. I will spread the word and hopefully you will hear from other concerned parents as well. Vaccines should always be a choice to the people when there are risks to consider. Don't take that away from us. Please hear us out and **DO NOT SUPPORT THIS BILL.**

Thank you.

Sincerely,

Alison Sanders

Klamath Falls Oregon, 97603
