

Hello, My name is Ro Lewis, I live in Medford zip 97504. I tried to attend the hearing this morning in Medford regarding HB 2020. I agree with the representatives I did hear from Talent and Phoenix who support the measure and want it to go further.

I am not a climate scientist, nor an economist. I am a human being who likes living in Oregon and wish to save this beautiful State. I would like to do my part to save the country and the entire planet. It is time for this bill. Please know there are more people like me who are for this bill in Southern Oregon.

Thank you
