

We as Oregonians and Americans must oppose Bill 2020: Cap and Trade.

Simply put we have been and remain the most environmentally responsible nation on earth. Even if we did enact this economically crushing bill it would have little to no positive impact. Why ?

No.1) Because the rest of the world (China, Russia, all countries to our west) with prevailing winds

will continue to transfer their carbon pollution upon us.

No.2) There is no credible real scientific research which concludes that Bill 2020: Cap and Trade

will benefit us at all.
