

Stop! this is poorly crafted and will devastate the areas that carefully and thoughtfully put together living and business interests side by side. There is much sense to how these areas built up and how they form strong communities. SB10 is a mish-mash of ideas that make no sense at all. Areas in my community in Portland that are growing in density are working to complete the density process and they need none of the ideas in SB10. For Pete's sake, leave well enough alone.
