

To Whom It May Concern:

My name is Esperanza Navarro. I live in Forest Grove, Oregon. I want to respectfully ask that you read my request. I am a mother of 3 kids ages 9, 6 and 3 who had to leave my hometown and extended family because of the passage of bill SB277 in California. My son who is now nine had a harmful reaction to the MMR vaccine in 2011. I did not want to leave my hometown and family, but I was not going to be responsible for my kids dead and/or chronic suffering. Before making a decision to consider the bill HB 3063 do what is right for our kids. Please look at the following research for yourself: Dr. Thomas Cowan's book Vaccines, Autoimmunity and the Changing Nature of Childhood Illness. As well as the research of Dr. William Thompson and Andrew Wakefield who destroyed their lucrative career because of the extensive factual evidence that proved of the deadly consequences and inhumane suffering that vaccines were having on our children and the human species. Please educate yourselves on the vaccine issue. Please take the time to look at our country's health crisis. It is a fact that during this era the amount of pharmaceuticals is at its peak than ever before. It cannot be denied that chronic illness amongst adults and children is higher than ever.

As a parent I am imploring to have me keep the right to decide on the health of my children especially when there is scientific literature and data to support the fact that vaccines have deadly consequences short and long term depending on each person due to the chemicals that need to be added to the vaccine. My family and I are living proof that we don't need vaccines to stay healthy. My kids and myself are not vaccinated and since I stopped giving vaccines to my children 3 years ago they have not step into a hospital. They are joyful, kind and healthy children. I am not making this up I have blood work and evidence to prove what I am stating today. Please don't take away the opportunity for my kids and many other children to accomplish their mission in this life in a happy and healthy manner. Anyone who is scared to not vaccinate I can definitely guide you.

Sincerely,
Esperanza Navarro
