

Hello Representative Prusak,

I am writing to urge support for closing the loopholes for immunizations, except for bonafide medical exemptions.

I am an orthopaedic surgeon with 2 small children who are immunized.

I am very concerned about the influence in the Legislature that misinformed people have about the efficacy and disease prevention that Immunizations offer.

I can attest that the immunizations are very important and hope you will support any efforts to implement appropriate disease protection via immunizations.

Sincerely,

Mark B. Wagner, MD
