

I'm including a link from an immunologists stating that unvaccinated children pose zero risk!  
I am the parent of a vaccine injured child. My son received his tdap vaccine at 2 years old less then 24 hours later he had a grand Mal seizure and coded.. Died! He was resuscitated then remained in a coma for a week.. He went from a beautiful sweet smart boy to having seizures frequently and is now 19 years old still having seizures still at a 3rd grade level. He is alive I am thankful for that. I'm not against vaccines that are truly tested effective and safe but since the manufacturers have no liability for their products and there is risks big ones as the vaers has already paid out billions for vaccine damages in 2019 !!! Where there is risk there must be choice.. I demand you protect the innocent and do not make ANY MANDATES for any vaccines! Please read the studies and article by copying and pasting into your browser. I trust that you work for the people and not the corporations. Thank you for doing the right thing!
