

To Whom It May Concern,

I am very concerned and frightening by House Bill 3063 which would take away my right as a mother to do what I feel is best for my children's health. As most people who do not believe in mandatory vaccination it is because of education, belief and a parent's right to raise their child in the safest way they are able.

I am shocked that when there is a closed/secret court for families of vaccine injured children my government is trying to force my children to have injections in their body that go against what I feel is safe, ethical and can lead to much more harm than good.

I wish I was able to testify in person but because of work schedule I am unable and hope this email does not fall on deaf ears and blind eyes.

For my government to feel they need to step on my rights as a parent is truly disgusting. The unvaccinated rate in Oregon is less than 3% and truly the government should have more meaningful topics to focus on such as healthcare, houseless-ness, discrimination, our failing infrastructure, and education just to name a few.

As a constituent of this great state it would be a shame if big pharma is put in a higher regard than a parent being able to decide what is in the best interest of their own child's safety.

I look forward to a reply on this very important matter and thank you for your time.
