

"I am Libby Radabaugh and I oppose HB 3063. I do not believe a child should be excluded from schools because the parent chooses to exempt their child from one or more vaccines due to religious or philosophical reasons. Please vote no on HB 3063."

If you look at the research there are MANY children being injured by vaccines. There are family history such as my own and my husbands that have had children severely autistic as well as failure to thrive with no known explanation immediately following these vaccines, and this was before the many more that have been added since our childhood. ADD, childhood cancers are all involved now.

While I support vaccines as a whole, and for those that can get them that is great, demanding and forcing products regarding our health on those that have had family history and or concerns regarding their children's health is not freedom. Nothing should be mandatory, that is not freedom. Suggested, encouraged, but not enforced.

Please do not force families to go against what they know is safe for their specific situation. It will cause a great decline in the moral of America as well as people leaving the state.
