

Dear legislators,

Please, please, please DO NOT support House Bill 3063, which would remove all nonmedical exemptions for vaccination!

Freedom of medical choice is important for so many families, including mine, that has been affected by vaccine injury or cannot process metals in vaccines.

Please think of how this discriminates against minorities and do not mandate all vaccinations. My family is not anti-vaxx, but pro-choice in that we selectively choose vaccines that are best for us based on our unique circumstances. Oregon's unvaccinated rate is under 3% and this bill will not eliminate the rare occurrence of small outbreaks. We want more education available for our health and to keep our freedom of choice. I hope you vote for freedom.

Sincerely,

Zoey Petrone
