

Please place my objection to HB2020 on the record, because, if passed, it will cause serious economic harm to all OR citizens and businesses (except for special "carve outs"). The state government's fiduciary duty and obligation, per the OR constitution, to knowingly cause no economic harm to the citizens of OR is being grossly disregarded. And all for NO environmental benefit as claimed.

Public input is closed on Friday, March 1, but your final "public input" meeting is not til Saturday, March 2. Whatever could be wrong with THAT picture?

Sincerely,
Judith Beals
Gold Hill
