

Hello,

I urge you to NOT support this bill. If vaccines were safer then I would be all for it, but as it stands now, these vaccines are NOT safe. I have two children and they are both NOT vaccinated. I've watched a friend go through nightmares because they had their child vaccinated. Days later he is not the same baby. It's heartbreaking. They moved back to Kansas to be with family, they needed help. I thank my lucky stars everyday that my children were not affected by that. Oregon's unvaccinated rate is only 2.6%. Please leave the medical exemption alone!!
