

Hopeful representation,

Several years ago we moved our business out of California because cap and trade along with other stifling legislation had removed our profit. People assume that climate change is solely mans fault. That is false and the earth has experienced profound climate change long before man existed.

Has anyone considered how many tons of toxic, climate changing gases and particulates, one volcanic eruption throws into the air? Way more than we do and they are erupting almost daily. There are better methods to improve our part in keeping the environment cleaner than killing our businesses and making it more expensive for our citizens. We need to think and NOT react. Science has given us many alternatives.

Please consider the other alternatives and do not be Californian's sheep. We are Oregonians, NOT sheep. Please feel free to contact me if I can be of further assistance or any of my learned associates.

Sincerely,

John Russ
President
