

To whom it may concern,

I'm writing to say that I OBJECT to the following bill HB 3063 from being passed. I believe we should be able to exercise our rights as parents/legal guardians of our children in regards to their medical care and what they receive. I know people personally that have had medical issues following receiving vaccinations. While I am not anti- modern medicine I do believe in the right to choose. Just like we fight for our "right to choose" in many other things I believe we should have that right when it comes to whether or not we vaccinate our children. Please listen to the people. Our concerns are valid! Thank you,

Kelsey A.
