

To Representatives on the House Health Care Committee:

Hello my name is Daphna Tupper and I am an Oncology nurse and I urge you to support HR3063 which seeks to remove the non-medical vaccine exemption from Oregon Health law. Oncology patients are frequently immunocompromised during the treatment, Coming into contact with something like measles during this time can be fatal. These patients have no little to know protection from the types of outbreaks that recently occurred with the measles outbreak in southern Washington and Oregon. I urge you to support HB 3063.

Thank you,

Daphna Tupper RN
