

I am writing on behalf of my family and community as a whole.

We are absolutely against this law to take away our freedoms to choose the appropriate healthcare procedures for our children.

My kids have been damaged by vaccines and I will no longer turn a blind eye on vaccines!

I have been doing a lot of research and I will stand up and protect their rights and our rights to our own bodies.

You cannot force those chemicals into our bodies.

Sincerely

Lora Losinger
