

I was so disappointed to see this in my inbox today:

"SB 3063 to end all vaccine exemptions is being fast tracked for this Thursday. As it's worded, anybody not in full compliance could also not attend any facility that has childcare such as church, YMCA, Cub Scouts."

As if this bill were not poorly written and thought out to begin with, now they are fast tracking it in the middle of a snowstorm!

I am writing to ask our civil servants to please reconsider this DANGEROUS bill. You can't vaccinate everyone the same way on the same schedule.. humans are uniquely different! My kids are healthy enough to withstand this ignorant, greedy scheme, but so many people are not.

Please take your time to research why Medical Freedom is imperative these days! The precedent we set by vaccinating everyone "the same" way will likely lead to health care industries continuing their terrible ideas to treat everyone the same ways. Health and wellness just don't happen in that paradigm.

Humans should have the freedom to choose their medical treatments as they see fit. It is unconstitutional to handle this any other way! It is also disrespectful and dangerous.

Please VOTE NO ON SB 3063!
