

Hello,

My name is Steve Korin and I live at 534 Sunnyside Drive in Eugene, Oregon, 97404. As a father of an 8 year old daughter and someone who cares about the world we are leaving the next generations, I demand action to address climate change. We are at a critical global crossroads with a limited window where we can stop the most catastrophic impacts of climate change. The Oregon Climate Action Program would make needed change in Oregon as well as setting a national example of beginning to address this issue. All change has a cost and many opposed to this bill will bring up short term impacts on their lives. Without the sort of change put forward in House Bill 2020, we will see severe short and long term impacts of climate change for us all. Thanks for considering my thoughts.

Steve
