

Hello, my name is Valente Ornelas. I live in Grants Pass Oregon and here is my statement in support of HB2020.

HB2020 policy must be science based to reduce all greenhouse gas emissions (not just CO2) by 45% by 2035 and at least 80% by 2050.

In order to put a price on greenhouse gases we need to form regional partnerships so that all of Oregon's communities have a stake and

benefit from investments created by this policy. Transitioning from a fossil fuel economy to clean renewable energy will create job growth in

Oregon. Investment in solutions must span across all communities and all income groups. These investments will give Oregon a competitive

economic advantage for our future.
