

To whole this may concern,

I am a registered nurse in Texas and would like to voice my concerns. Please oppose HB 3063. We have a right to choose what goes in our bodies. As a bedside nurse, I see Infants stop breathing post vaccinations and we have to resuscitate them... I see the negative side effects. We should choose what goes in our children, not government. Thank you, Sheila Gene 210-573-4857
